Albert Einstein Hospital informs that patient with new coronavirus does not need hospitalization and will be isolated

Society 26.02.2020 00:08

Albert Einstein hospital in São Paulo released the following note about Covid-19's first case:

"Hospital Israelita Albert Einstein informs that on the night of February 24, at the Morumbi Unit, in São Paulo, it received a patient with symptoms similar to Covid-19, and the viral infection with the new coronavirus was confirmed after the PCR test was performed. In real time. On the morning of February 25, the case was notified to the Epidemiological Surveillance of the State of São Paulo.

The emergency care team strictly followed all protocols established by the Ministry of Health, World Health Organization (WHO) and Centers for Disease Control and Prevention (CDC-USA), to offer the appropriate care and ensure patient safety and of all the professionals involved.

The patient is in good clinical condition and without the need for hospitalization, remaining in respiratory isolation that will be maintained for the next 14 days. The medical team continues to actively monitor him, as well as people who have had close contact with him.

Since the beginning of the global epidemic, Hospital Israelita Albert Einstein has maintained an active agenda for monitoring the progress of new cases and the evolution of the world scenario. The Hospital, which has the most advanced diagnostic and assistance resources for the services that are necessary, including the most serious ones, has been working on the intensive training of its employees in order to ensure the provision of adequate care, as well as the safety of patients, family members and employees.

Hospital Israelita Albert Einstein reinforces that the standards of conduct in all situations are focused on preserving the safety of all patients at the institution and maintaining excellence in care of any nature."
